

The public record of who Parliament lets into power, *and on what evidence.*

INSTRUMENT

Public Appointments Record, Republic of Kenya

PROPOSED HOST

Civic Tech Tools, Mzalendo Trust (partnership not yet agreed)

PREPARED BY

Agent9 · September 2026

— 01 • THE PROBLEM

93 nominations. One rejection.

Kenya's Parliament vets every Cabinet Secretary and Principal Secretary before they take office. Across three vetting cycles the gate said yes 92 times.

Cabinet, 2022

22 NOMINATED • 22 APPROVED

Principal Secretaries, 2022

51 NOMINATED • 51 APPROVED

Cabinet reconstitution, 2024

20 NOMINATED • 1 REJECTED

■ APPROVED BY THE HOUSE ■ REJECTED BY THE HOUSE ONE SQUARE PER NOMINATION

02 · WHAT THE RECORD SHOWS

A mass dismissal that returned half the cabinet.

On 11 July 2024, during the Finance Bill protests, the President dismissed the cabinet. Four weeks later, Parliament approved its replacement. The pattern appears only when appointment histories are linked per person.

TABLE 1 · KEY FIGURES, THREE VETTING CYCLES

98.9% Approval rate across three vetting cycles (92 of 93)	10 of 19 2024 appointees who sat in the cabinet dissolved four weeks earlier	9 of 10 Returnees who simply changed docket	231 days Gender docket vacant after the only House rejection
--	--	---	--

— 03 • WHAT VETTA DOES

One durable, citable record for every public appointment.

BEFORE • T-30 TO HEARING

Dossier

Source-linked appointment history for every nominee. A public question queue, ranked by citizens.

DURING • 28-DAY WINDOW

Hearing record

Which questions MPs asked, which they ignored, per topic. Silence becomes visible.

AFTER • POST-VOTE

Vote trail

Committee report against citizen submissions. A per-MP record, shareable at the next election.

OUTPUT AT EVERY STAGE

| A dated, source-linked entry in the public ledger, hashed and mirrored so it cannot be quietly withdrawn.

04 · THE LEDGER

Every appointment linked to the person.

- i. 93 people, 111 appointments, each with its nomination, decision and exit dates.
- ii. Every fact cited to dated reporting or the official record.
- iii. Cross-checked across independent sources before it ships.

2 signals · 5 sources

How to read this record

Signals describe the appointment process, not the person. A record with no signals is not an endorsement; a record with signals is not an accusation. Spot an error? [Tell us securely.](#)

RECORD INTEGRITY

sha256 of the canonical record

627b4fd55c78db7887f32e48be5a2dbfdcad41ce5d89214977c00a1874a93c67

Any mirror serving this record must reproduce this hash. [How to verify](#)

05 · PATTERN SIGNALS

Computed, not asserted.

- i.

8 deterministic rules run over the ledger at build time.
- ii.

Each rule is stated in plain language, so anyone can re-derive a match by hand.
- iii.

A signal marks a pattern in the process. It is never a finding about a person.
- iv.

The ledger has already caught two errors in the project's own working notes.

Vetting Record » Signals

Pattern signals

Deterministic rules run over the ledger at build time. Each rule is stated in plain language so a reader can re-derive every match by hand. A signal marks a pattern in the appointment process worth scrutiny. It is never a finding about a person.

Correction caught by the ledger: the returnee rate

Working notes put the 2024 returnee figure at 6 of 19 (32%). Six is the returnee count in the first batch of eleven nominees (19 Jul 2024). Across both batches the linked record gives **10 of 19**: 9 former Cabinet Secretaries and one former Attorney General.

Correction caught by verification: the Ghana no-show

Working notes said a nominee who declined and never appeared was nonetheless posted to Accra. Dated reporting shows his name reached the Gazette on 3 May 2024, which State House called a mistake, and the appointment was then revoked. The signal now records what happened: the name was *gazetted without approval*, and the error was corrected afterwards.

Rejected at the gate

The House rejected the nomination after a vetting hearing.

Rejections are the rare documented cases where committee scrutiny changed an outcome. Their stated grounds are primary evidence.

Stella Soi Lang'at

Rejected for Gender, Culture, Arts and Heritage: "failed to demonstrate adequate knowledge of topical, administrative and technical issues touching on the portfolio"

Charles Githinji Kiiru

Rejected for Consul-General, Goma (DR Congo).

Design requirement 4: Record stated grounds verbatim

Returned after dissolution

Approved in the 2024 reconstitution after holding a cabinet seat (CS, Prime CS or Attorney General) in the cabinet dissolved on 11 Jul 2024.

A protest-forced dissolution that returns many of the same people is only visible when appointment histories are linked per person.

SCREENSHOT OF THE WORKING PROTOTYPE, SEPTEMBER 2026

06 / 10

06 · BUILT TO STAY UP

A public record is only useful if it survives pressure.

NO.	SAFEGUARD	STATUS	WHAT IT GUARANTEES
6.1	Static site	LIVE	No database to take down. Any host, mirror or USB stick can serve it.
6.2	Content hashes	LIVE	SHA-256 per record plus a ledger root. Tampering on any mirror is detectable.
6.3	Open data export	LIVE	Ledger, manifest and events published for independent archiving.
6.4	Signed Nostr events	READY	Each record is a replaceable, signed event. Blocking one domain does not remove it.
6.5	Secure tip line	PLANNED	Sealed messages to reviewers, reachable even if the domain is blocked.

— 07 • EDITORIAL SAFEGUARDS

“A record with no signals is not an endorsement. A record with signals is not an accusation.”

ART. 1 No bare allegations

Every flag cites a source document, and rejection grounds are recorded verbatim.

ART. 2 Process, not persons

Signals describe how an appointment moved through the gate.

ART. 3 Corrections are first-class

A secure reporting channel, and corrections replace the old record everywhere it is mirrored.

ART. 4 Experimental scoring stays gated

The Integrity Index runs on synthetic data, stamped MOCK and pseudonymised for any public deployment.

08 · WHERE IT STANDS

Working prototype today. Election-ready by 2027.

PHASE	WORKSTREAM	STATUS	SCOPE
I	Ledger and signals	BUILT	93 records sealed, 8 signal rules, overview, vetting gate, scoring sandbox
II	Resilience layer	BUILT	Static build, content hashes, open data, Nostr export
III	Hardening · Oct to Nov 2026	NEXT	Gazette watcher, Hansard parser, citizen questions, CSO submission portal
IV	Scale · 2027	NEXT	Kiswahili interface, SMS alerts, per-MP scorecards ahead of the August 2027 election
V	Partnership	OPEN	Hosting and editorial ownership with Mzalendo, not yet agreed

Put the vetting gate on the record before the 2027 election.

- 01 **Host VETTA** under Mzalendo's Civic Tech Tools.
- 02 **Own the editorial review**, with corrections handled in the open.
- 03 **Put every appointment** in the next Parliament on a public, verifiable record.
