Colour, clear space and minimum size

VETTA Black

HEX #000000
RGB 0 0 0
CMYK 0 0 0 100 (type)
RICH 60 40 40 100 (large areas)
PANTONE Black 6 C *

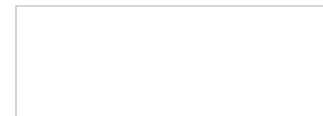

Signal Red

HEX #FF0000
RGB 255 0 0
CMYK 0 100 100 0 †
PANTONE 485 C *

Apex Red

HEX #950101
RGB 149 1 1
CMYK 0 99 99 42
PANTONE 7622 C *

Paper White

HEX #FFFFFF
RGB 255 255 255
CMYK 0 0 0 0
PANTONE none (unprinted)

CLEAR SPACE

Keep at least X clear on all sides, where X is the width of one plane at the top of the mark.

MINIMUM SIZE

Horizontal: 25 mm / 120 px wide

Mark: 6 mm / 16 px

DO NOT

- × Recolour the planes or swap the reds
- × Add shadows, gradients, outlines or transparency
- × Stretch, skew, rotate or re-space the wordmark
- × Retype VETTA in a font; the letters are custom drawn
- × Place full colour on red or busy photography; use the one-colour white version instead

* Pantone references are screen-derived starting points; confirm against a printed Pantone guide before a spot-colour run.

† #FF0000 is brighter than any CMYK ink can print. Process print will read deeper; specify the Pantone spot where colour is critical.
